

A PDAC ICI-containing cohorts: score distributions

B Direction and precision across response cohorts

C Cohort role determines the evidence boundary

Primary association

PRINCE | PDAC | nivolumab-containing | n=38
 Internal association; not an external validation.

Directional sensitivity

GSE179351 | PDAC | RT + dual ICI | n=6
 Same point direction, but too small to replicate.

PDAC association-transportability audit

GSE248014 | entinostat + nivolumab | n=23; 3 R
 Opposite point direction; no non-ICI comparator.

Cross-cancer boundary

GSE78220 / GSE91061 | melanoma cohorts
 Mixed directions; neither PDAC replication nor refutation.
